

CLAIMS

I Claim:

1. A hockey practice system, comprising:
a panel including a plurality of openings; and
a plurality of targets positionable within said plurality of openings.

2. The hockey practice system of Claim 1, wherein said panel includes a first support and a second support for providing support to said panel in a vertical manner.

3. The hockey practice system of Claim 2, wherein said first support and said second support are pivotally attached to said panel.

4. The hockey practice system of Claim 2, wherein said first support and said second support are attached to side portions of said panel.

5. The hockey practice system of Claim 1, wherein said plurality of openings are each comprised of a square shape.

6. The hockey practice system of Claim 1, wherein said plurality of openings are comprised of at least two vertical rows and/or at least two horizontal rows.

1 7. The hockey practice system of Claim 1, including a handle attached to an
2 upper portion of said panel.

3
4
5 8. The hockey practice system of Claim 1, wherein said plurality of openings
6 are comprised of sixteen openings.

7
8
9 9. The hockey practice system of Claim 8, wherein said sixteen opening are
10 comprised of a 4x4 structure.

11
12
13 10. The hockey practice system of Claim 1, wherein said plurality of targets are
14 comprised of a resilient material.

15
16
17 11. The hockey practice system of Claim 10, wherein said plurality of targets
18 are comprised of a sponge material.

19
20
21 12. The hockey practice system of Claim 10, wherein said plurality of targets
22 are larger than said plurality of openings.

23
24
25 13. The hockey practice system of Claim 10, wherein said plurality of targets
26 have a shape similar to said plurality of openings.

1 14. The hockey practice system of Claim 1, wherein said plurality of targets
2 each have an indicia.

3
4
5 15. The hockey practice system of Claim 14, wherein said indicia is comprised
6 of a number.

7
8
9 16. The hockey practice system of Claim 15, wherein said plurality of targets
10 are numbered consecutively.

11
12
13 17. The hockey practice system of Claim 16, wherein said panel includes a
14 corresponding number of indicia adjacent each of said plurality of openings that
15 indicate where each of said targets are to be positioned.

16
17
18 18. The hockey practice system of Claim 1, including a goalie member attached
19 to a front portion of said panel.

20
21
22 19. A hockey practice system, comprising:
23 a panel including a plurality of openings each comprised of a square shape,
24 wherein said plurality of openings are comprised of at least two vertical rows and/or at
25 least two horizontal rows;

26 a first support and a second support pivotally attached to side portions of said
27 panel for providing support to said panel in a vertical manner;

1 a plurality of targets each comprised of a square shape positionable within said
2 plurality of openings, wherein said plurality of targets are comprised of a resilient
3 material and wherein said plurality of targets are larger than said plurality of openings;
4 a handle attached to an upper portion of said panel; and
5 an indicia positioned upon each of said plurality of targets, wherein each of said
6 plurality of targets has a different indicia.

7
8
9 20. The hockey practice system of Claim 19, wherein said panel includes a
10 corresponding number of indicia adjacent each of said plurality of openings that
11 indicate where each of said targets are to be positioned.
